for repairs, defective devices, warranty claims, return of lend devices, equipment and assemblies, returned devices and the disposal of waste equipment.

To protect our employees it is necessary, that all Becker DMT devices and/or assemblies are free of any biological, chemical and radioactive contamination.

Attention:

All Becker DMT devices and/or assemblies should be rinsed and cleaned only in clear water. Acids or other chemicals and/or biological substances must be neutralized before rinsing and cleaning with clear water.

DO NOT!!!! blow through the Becker DMT flow meters and/or assemblies with compressed air!

We can only accept Becker DMT devices and/or assemblies, if

- **these devices are sufficiently cleaned and decontaminated.**
- **these devices are send in together with the completely filled out declaration signed by an authorized person.**
- **this declaration has been put up at the package visible from outside.**
